Providing Life-Changing Autism Treatment to Children Throughout Georgia

All families want the best for their children. If you know a child who has been diagnosed with an autism spectrum disorder, we can help. Our skilled therapists work with families in Georgia and throughout the country to deliver individualized services to children up to age 21.

ChanceLight offers autism services and utilizes Applied Behavior Analysis therapy – or ABA – which is widely recognized as the most effective, evidence-based treatment for autism. Studies indicate the earlier children receive ABA therapy, the more gains they make.

We use this proven treatment approach to develop a customized treatment plan to help each child reach his or her full potential. ChanceLight inspires and guides families through the treatment process with hands-on support, education and training to make the greatest possible positive impact on the life of each child.

Getting to Know Our Families

We take the time to develop meaningful relationships with our clients and understand each family’s unique dynamics. We assess every child’s current level of functioning, prescribe the appropriate set of programs for him or her to begin treatment, and interactively train families and their team of therapists.

Our energetic and enthusiastic therapists are passionate and eager to start making a difference in the lives of children throughout Georgia.

We Work Where Families Need Us

ChanceLight understands families need treatment options to help accommodate unique scheduling and geographic challenges. We provide our comprehensive services to children and families in their homes, in our clinics, in schools, and near military bases throughout the country. Some families prefer the one-on-one teaching and convenience of our home-based services, while others value the peer interaction their child receives in a clinic setting. We also work with school districts across the country to provide staff training, consulting and ABA programming.

How Can You Refer a Patient to ChanceLight?

Studies indicate the earlier children receive ABA therapy, the more gains they make. We serve children of all skill levels across the autism spectrum up to age 21.

If you have a patient that would benefit from ABA therapy, we offer the following easy referral options:
1. Refer a family to our intake coordinator. Families can call (888) 227-7212.
2. Fax a referral to Attn: Intake Coordinator to (615) 815-1946.
3. Contact Anna Bullard, VP of Business Development at (912) 293-5217.

Insurance and Funding Coverage Options

As a result of recent policy changes in Georgia, more children with autism have coverage for ABA therapy. Ava’s Law originally passed in 2015 as a result of Anna Bullard’s fight to secure ABA coverage for her daughter Ava and children throughout Georgia diagnosed with autism.

CURRENT BENEFITS OF AVA’S LAW:
- $35,000 annual coverage for families for ABA therapy
- ABA therapy coverage up to 20 years of age
- Option for families to purchase Affordable Care Act “child only” plans that cover ABA therapy

ABA THERAPY IS ALSO COVERED BY:
- Many commercial insurance providers
- Government providers such as TRICARE for active duty and retired military personnel
- Medicaid
- Certain companies pay for all or some ABA therapy

INSURANCE ELIGIBILITY REQUIREMENTS INCLUDE:
- A diagnosis with a written diagnostic test by a licensed physician or psychologist, or other licensed professional as designated by the Medical Composite Board
- A prescription for ABA therapy

Our trained professionals can provide support to help families determine their insurance benefits.
We Work Where Families Need Us

ChanceLight understands families need treatment options to help accommodate unique scheduling and geographic challenges. We provide our comprehensive services to children and families in their homes, in our clinics, in schools, and near military bases throughout the country. Some families prefer the one-on-one teaching and convenience of our home-based services, while others value the peer interaction their child receives in a clinic setting. We also work with school districts across the country to provide staff training, consulting and ABA programming.

We offer intensive, research-based behavioral treatment that yields the best outcomes for children, which is why we strongly value and practice Applied Behavior Analysis therapy.

According to Autism Speaks, the world’s leading autism science and advocacy organization, ABA fosters basic skills such as looking, listening, requesting and imitating, as well as complex skills such as reading, conversing and understanding another person’s perspective. ABA also helps reduce behaviors that make it difficult for children to learn.

Working closely with families and education professionals, ChanceLight uses the principles and procedures of ABA to teach language, social, self-help, academic, daily living and life skills. We develop customized ABA therapy programs and equip each child’s home, clinic and/or school team with the training and supervision necessary for high-quality, consistent teaching and behavioral intervention.

Families appreciate the added reassurance of knowing our plans are developed and monitored under the direction of a Board Certified Behavioral Analyst (BCBA). Services are intensive, and the schedule and frequency of services is designed to meet each child’s individual needs.
